

Landis+Gyr

320A Disconnect Switch Now Available on FOCUS AXe-SD

Landis+Gyr proudly introduces our latest addition to the FOCUS AXe-SD family, the Form 2SE with a 320 amp disconnect switch. This industry-first solution addresses the growing trend of larger residential service sizes and provides greater flexibility for serving a diverse customer base.

Technology Design Proven Through Millions of Successful Installations

Optimal design of the disconnect switch is demonstrated by the millions of deployed 200 amp meters installed and reliably operating today.

Industry-leading Safety Confirmed by UL Listed Certification

The 320 amp disconnect switch has passed rigorous testing to confirm safe and reliable disconnect service at full-rated current for thousands of operations.

Multiple Load Limiting Options for Initiating Disconnect

In addition to direct switch actuation, multiple load limiting features allow disconnect when a specific power or average demand level is reached.
